Multiplication Word Problems

1. A garden has rows of flowers planted. Each row is 6 feet long. If there are 8 rows, what is the total length of all rows combined?

2. Each packet of seeds can cover 5 square feet of a garden. If a gardener uses 30 packets, what is the total area covered in the garden?

3. If each bottle of water contains 2 liters, how many liters are there in total in a box containing 25 bottles?

4. A recipe calls for 3 cups of flour for each loaf of bread. If a baker wants to make 15 loaves, how many cups of flour will he need?

5. A classroom is 8 meters long. If the classroom is double this length, how long would it be?
