## Subtraction Word Problems

1. You bought a shirt for \$139 but found the same one for \$64 less elsewhere. You then bought a tie for \$26 and socks for \$15. What's the difference between what you paid and the lower price with the additions?
2. A restaurant made \$384 in the morning, lost \$172 in the afternoon, gained \$246 in the evening, but then needed to give \$94 to a supplier. How much did they earn for the day?
3. A bakery sold \$532 worth of pastries. They then sold \$123 fewer in the afternoon, earned \$189 more the next day, and lost \$86 in unsold goods. What will remain at the end of the two days?
4. A store sold \$782 worth of goods. They then decreased by \$265 during a slow period, increased by \$439 during a sale, and had \$123 taken away in returns. What's the total now?
5. Tim had \$834 in his account. He added \$213 but then subtracted \$398 for rent and another \$96 for utilities. He then received a gift of \$145. How much heavier is his account now?
